Professional Summary

B.Tech Computer Science and Engineering student (2025–2029) with hands-on experience building AI-powered tools, workflow automation systems, and full-stack applications. Strong interest in AI/ML engineering, model evaluation, prompt quality, output validation, and deploying AI-enabled systems into practical workflows. Comfortable with Python, data processing, Git, Docker, and modern development tools.

Education

B.Tech in Computer Science and Engineering — Symbiosis Institute of Technology, Hyderabad (2025–2029)

Technical Skills

• Programming Languages: Python, C++, C, JavaScript

• AI/ML: Generative AI, LLMs, AI agents, prompt engineering, model evaluation, training workflows, output validation

• Data & Analysis: Pandas, NumPy, spreadsheet/data processing workflows, SQL fundamentals

• Web Development: React, HTML, CSS, Node.js, REST APIs

• Tools and Platforms: Git, GitHub, Docker, VS Code, Google AI Studio, Postman, n8n

Experience

ML Engineer (Contract) — Handshake AI, California, USA (Jul 2026–Present)

• Evaluating AI and LLM outputs for accuracy, relevance, consistency, and usability

• Working on prompt-based systems and iterative model improvement through feedback

• Building and testing automation pipelines for real-world tasks

• Comfortable setting up and debugging local development environments

• Experienced with Git/GitHub collaboration, Docker workflows, and REST API integrations

Projects

AI Accountant Agent (Mar 2026–Present)

• Developing an AI-powered accounting automation agent for financial calculations, expense tracking, ledger understanding, and report generation

• Manually validating AI-generated outputs against hand calculations to evaluate accuracy and refine workflows

• Tech: Python, n8n, LLM APIs, spreadsheet/data processing workflows, automation pipelines

Pinterest Affiliate Automation App (May 2026–Jun 2026)

• Built an AI-powered Pinterest affiliate marketing automation tool that takes a niche/topic as input and generates Pinterest-ready titles, descriptions, keywords, and content workflows

• Evaluated output quality by checking product–niche match and content relevance

• Tech: Python, React, Node.js, LLM APIs, REST APIs

AI Tutor (Sep 2025)

• Built an intelligent tutoring platform prototype using generative AI and LLMs for personalized learning experiences

• Worked on AI-generated educational responses and learning-focused interfaces

• Tech: Python, React, external APIs

StadiumFlow (Mar 1–20, 2025)

• Designed a crowd-navigation and stadium experience application to help users view live position, navigate to seats, locate amenities, and order food using ticket details

• Tech: React, Node.js, Maps/navigation APIs, geolocation services, ticket-linked workflows, REST APIs

Automated Tractor Prototype — Project Expo, Symbiosis Institute of Technology, Hyderabad

• First hardware project: built an automated tractor prototype for the college Project Expo

Hackathons & Activities

Smart India Hackathon — Sep 2026
Open AI Virtual Hackathon — Mar 2026
24-Hour Hackathon (Algorand) — May 2026
Smart India Hackathon — Sep 2025

Volunteered at Under 25 Summit: event coordination, participant support, and technical assistance
Participated in technical presentations and speaking activities

Additional Information

Strong interest in AI systems, automation, SaaS product development, and entrepreneurship
Comfortable working on AI-driven projects involving evaluation, validation, experimentation, and iterative improvement
Actively building portfolio projects that combine product thinking, AI workflows, and real-world problem solving
